Vadodara, Gujarat

Summary

Product-focused engineer with 7+ years of experience building mobile apps, admin platforms, and full-stack systems for high-growth startups. Solely led the Flutter ecosystem for a US-based product, owning architecture, development, analytics (PostHog), CI/CD automation (Codemagic), and end-to-end deployments. Strong at transforming business needs into scalable product features, improving internal ops workflows, and rapidly shipping MVPs using **Flutter**, **Next.js**, **Node.js**, **Supabase**, **AWS**, and modern product thinking.

Product Engineer • Full-Stack • Mobile Systems

Education

BE - Computer science and engineering

Gujarat Technological University Ahmedabad • Vadodara, Gujarat

05/2017

First class with distinction (7.5 CGPA)

Skills

Product Development, Flutter, Node.js, TypeScript, Next.js, Supabase, MongoDB, MySQL, Codemagic CI/CD, PostHog, System Design, MVP Planning, Communication skills, Leadership

Experience

Senior Product Engineer - Mobile Lead

Viva Chefs Inc. • San Francisco Bay Area, CA

04/2025 - Present

- Owned **end-to-end Flutter development** for Customer and Chef apps, handling architecture, implementation, testing, and production deployments.
- Automated Play Store & App Store releases using **Codemagic CI/CD**, reducing release time and errors.
- Implemented **PostHog analytics** for user behavior insights, event tracking, session replays, and performance monitoring.
- Built critical internal **Admin Tools built on react.js**, including:
 - **Dish Rate Calculator** enabling standardized pricing decisions.
 - Enhanced **Chef Detail View** with better data visibility and workflow improvements.
- Upgraded the **Booking Management System** with support for **tips**, **extra services**, **grocery bills**, syncing admin and chef-facing logic.
- Led UI/UX improvements across major customer and chef flows, improving clarity and reducing operational friction.
- Worked closely with founding, operations, and design teams for rapid product iteration.

Senior Software Engineer

Hire Curated - Restaurant Hiring Platform • San Francisco Bay Area, CA

08/2025 - 10/2025

- Developed and shipped customer-facing and admin-facing web features using **Next.js + Supabase** deployed on **Vercel**.
- Integrated **PostHog** for analytics, conversion tracking, issue diagnostics, and funnel optimization.
- Built a **User Analytics Dashboard** visualizing candidate activity and hiring performance metrics.
- Created a **Screening Template Builder** with dynamic questionnaires sent automatically to job applicants.

- Improved **Company Profile** management including branding images and admin workflow enhancements.
- Delivered all planned features within 2 months while maintaining high-quality production stability.

Software Team Lead - Product & Engineering

Smartnode Automations Pvt Ltd · Vadodara, Gujarat

12/2022 – 03/2025

- Led product development and coordinated daily stand-ups for team collaboration
- Conducted research on product features to meet market demands
- Managed the launch and development of product updates, ensuring timely delivery
- Contributed to cost-saving initiatives and optimized server management through backend systems and DevOps
- Provided strategic direction for the software team
- Actively developed innovative software products using Flutter to enhance user experience
- Implemented server cost optimization strategies
- Led product and system design discussions
- Facilitated product planning and decision making
- Built and nurtured a strong team through effective team building efforts

Senior Mobile Application Developer

Smartnode Automations Pvt Ltd · Vadodara, Gujarat

08/2020 – 11/2022

- Conducted code reviews to ensure code quality and adherence to best practices
- Implemented code optimization techniques to improve app performance
- Collaborated with product development and design teams to create innovative features and functionalities
- Mentored junior software developers to enhance their skills and knowledge
- Managed AWS EC2 server to handle high volume of requests efficiently
- Transitioned development process to cross-platform Flutter for Android and iOS applications

Flutter Developer (Part-Time)

MySivi (Formerly Speakify) (YC W22) · Bengaluru, Karnataka (Remote)

04/2022 – 10/2022

- Led the development of a minimum viable product (MVP) for an English communication skills learning app
- Implemented region-based authentication for Indian users
- Deployed the mobile application on both Android and iOS platforms
- Collaborated with a team to design and implement a feature-rich platform for practicing English speaking
- Developed a progress tracking system to monitor users' advancements
- Integrated an AI BOT for generating questions, suggested answers, and feedback on grammar and pronunciation

iOS Developer

Smartnode Automations Pvt Ltd · Vadodara, Gujarat

01/2020 – 08/2020

- Developed, maintained, and deployed a home automation module for an iOS app, handling both frontend and backend integration.
- Collaborated with cross-functional teams to ensure successful implementation and seamless performance.
- Managed the mobile UI/UX design to create an intuitive and user-friendly experience.
- Led manual testing efforts and provided technical support to resolve debugging issues, significantly enhancing app stability.

Android Developer

Smartnode Automations Pvt Ltd · Vadodara, Gujarat

09/2017 – 12/2019

Founding Android Developer at Smart Node, responsible for the development and maintenance of a comprehensive home automation app integrating various modules such as lighting, curtains, RGB, door lock, and IR control.

- Collaborated closely with product managers, designers, and hardware developers to ensure seamless feature implementation.
- Independently managed the mobile UI/UX design process, focusing on creating an intuitive and user-friendly experience.
- Led the deployment and provided ongoing support to ensure the app met both user expectations and company standards.
